# Expania

🇮🇳 India

Expania will help you to track your daily expense which ultimately will help you to save money and stop you to do any unnecessary expenses

## Features

» Home Screen: Easy view to see most of the information about the current month to show available balance, total income and expense.

» While you are adding any expense/income then it will give you to choose the

» category by searching instead of scrolling down or up.

» Expania helps you to show some specific data based on your requirement such as day view, Week View, Month View and custom date range selection

» It will help you to keep your data up to date and safe to access from multiple devices.

» You can easily see the month view using calendar and see the entries by tapping on each day.

» create as many accounts based on your needs to define initial balance and choose the account while adding income/expense which will be visible under the select account to see the all transactions of particular account with balance, expense and income entries.

» It will help you to show in chart with the Expense and Income for each month to see the overview of spending in each categories listed on the screen.
