

# Horse Data Drop

App for keep your own data about your horses well organized

## Features

- » You can add a horse in just a few clicks. In addition to the name, you can optionally enter the age, gender, color, height, origin and level.
- » You can easily find the horses later using the search function at the top of the app.
- » We have chosen the possibility to add a maximum of 10 videos and photos per horse so that you only have the best in your app. You can add the photos via your photo album or via your camera. You can also add the videos this way or with an additional link. You can directly forward the photos and/or videos via WhatsApp, message and email.
- » In addition, the pedigree can be completed as well with the link to horsetelelex.
- » The same applies to the results and veterinary reports, which you can also add via a link, file, photo album or your camera.
- » To make it complete you can add the horse's passport via your camera or photo album.
- » you are able to forward the complete horse profile including photos and videos in one file via WhatsApp, messages or email.
